

SANNI MUHAMMED ARAFAT

Lagos, Nigeria | +234 901 829 7659 | sanniwahab23@gmail.com

PROFESSIONAL SUMMARY

Highly skilled and versatile Senior Full-Stack Developer & DevOps Engineer with extensive experience designing, building, and deploying robust, scalable web applications. Expert in aligning frontend interactivity with powerful backend architecture while managing cloud infrastructure and automated CI/CD pipelines. Proven track record of optimizing application performance, configuring monitoring parameters, and orchestrating containerized environments to ensure 99.9% system uptime.

CORE COMPETENCIES

- Frontend Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design, State Management.
- Backend Engineering:** Node.js, Express.js, PHP, MySQL, MongoDB, Mongoose ORM, RESTful APIs, Microservices Architecture.
- DevOps & Infrastructure:** CI/CD Pipelines, Docker Containerization, Kubernetes Orchestration, Cloud Deployment.
- Monitoring & Logging:** Grafana Parameters, Prometheus, System Performance Metrics, Log Analysis.

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer & DevOps Engineer

January 2025 – Present

Independent Contractor / Tech Solutions

- Architect and maintain full-stack web applications using Node.js, PHP, and React, improving application load times by 35%.
- Design and secure scalable databases using MySQL and MongoDB, implementing efficient data models and automated database seeding scripts for high-volume applications.
- Build and manage end-to-end CI/CD pipelines to automate testing and deployment, reducing production release cycles by 40%.
- Containerize microservices using Docker and manage multi-container deployments across Kubernetes clusters to ensure seamless scalability and high availability.
- Configure and fine-tune Grafana parameters and Prometheus monitoring systems to track critical application health metrics, reducing system downtime via proactive alerting.

Full-Stack Developer

March 2025 – December 2025

Web Development Agency

- Developed responsive, user-centric frontend interfaces using advanced JavaScript, HTML, and CSS, resulting in a 25% increase in user engagement.
- Engineered secure backend RESTful APIs using Express.js and PHP architectures and integrated third-party services and payment gateways.
- Optimized database queries in MySQL and MongoDB, resolving bottleneck issues and reducing API response latency by 200ms.
- Collaborated on git-based version control workflows and participated in code reviews to maintain high code-quality standards.

PROJECTS

Automated Computer-Based Testing (CBT) Platform

React, PHP, MySQL, Docker

- Developed a full-stack, scalable examination portal capable of handling simultaneous user traffic during assessments.
- Engineered a custom database seeding mechanism to dynamically parse and populate complex question sets (including Mathematics and English formats) via CSV data.
- Deployed the application utilizing Docker containers, ensuring environment consistency between local development and live servers.

Real-Time System Attendance & Monitoring Dashboard

Node.js, MongoDB, Grafana, Prometheus

- Built a web-based attendance tracking and monitoring system featuring real-time data visualization.
- Integrated backend logging systems with monitoring metrics to track system resource usage and API up-times.

TECHNICAL SKILLS

Languages & Frontend	JavaScript (ES6+), HTML5, CSS3, React.js, Bootstrap
Backend & Databases	Node.js, Express.js, PHP, MySQL, MongoDB, Mongoose, RESTful APIs
DevOps & Cloud	Docker, Kubernetes, CI/CD Pipelines, Git, GitHub
Monitoring & Tools	Grafana, Prometheus, Linux CLI, Postman, CorelDRAW

EDUCATION & CERTIFICATIONS

National Diploma (ND) in Computer Science

Yaba College of Technology

Relevant Certifications:

- Advanced Full-Stack Web Development (Node.js, PHP, MySQL, MongoDB)
- DevOps Lifecycle: Docker, Kubernetes, and Continuous Integration
